

Staff Physician (Internal Medicine)

Our Staff Physician (Internal Medicine) will have a range of responsibilities relating to providing medical care to our patients. Specifically, our Staff Physician (Internal Medicine) will perform the following duties:

- 1) Refer patients to medical specialists, social services, or other professionals as is appropriate;
- 2) Participate in continuing education activities to enhance knowledge and skills;
- 3) Direct, coordinate, and supervise the patient care activities of the nursing staff and the support staff;
- 4) Write patient discharge summaries and send them to primary care physicians;
- 5) Direct the operations of short stay or specialty units;
- 6) Train or supervise mid-level or other health professionals;
- 7) Prescribe medications or treatment regimens to hospital inpatients;
- 8) Order or interpret the results of tests, such as laboratory tests and radiographs (x-rays);
- 9) Attend inpatient consultations in areas of specialty, such as for laboratory tests and diagnostic images; and
- 10) Serve and protect the community by adhering to professional standards, medical group policies and procedures, and federal, state, and local requirements.

REQUIREMENTS: Doctor of Medicine (M.D.) or foreign equivalent, Board Certification in Internal Medicine (equiv. to 36 months of training), and a Territory of Guam Medical License.
